EDUCATION

M.Sc Computer Science   08/2019 – 07/2021
Soban Singh Jeena University   Almora, Uttarakhand

B.Sc Computer Science   07/2017 – 06/2019
Uttarakhand Residential University   Almora, Uttarakhand

Intermediate(Class 12th)   06/2015 – 04/2017
G.I.C Daulaght Almora   Almora, India

HighSchool(Class 10th)   06/2014 – 04/2015
GOPESHWAR BAL NIKETAN   Almora, India

SKILLS

- Programming skills: Python, JavaScript, Data Structure and Algorithm

- Frontend: HTML, CSS, Tailwind CSS, Bootstrap, ReactJS, Redux, Next.js, React Native

- Backend: NodeJS, ExpressJS, NoSQL

PROFESSIONAL EXPERIENCE

Full Stack Developer   10/2023 – present
The SkyTrails
- Currently oversee **Business-to-Business (B2B)** and **Business-to-Consumer (B2C)** projects for **flight, bus,** and **hotel booking systems**, managing both frontend and backend functionalities. My work includes optimizing performance, ensuring smooth navigation, and updating systems for better user experience.
- On the backend, I manage **RESTful APIs**, database management, and server-side logic using **Node.js**, **Express.js**, and **MongoDB**, while implementing error handling and scalability improvements.
- Developed **APIs** utilizing **third-party API integration** for backend and frontend processes, ensuring seamless data flow and functionality across applications.
- Worked on a mobile application for **flight, hotel,** and **bus booking** using **React Native**, delivering a responsive and user-friendly experience.
- Integrated **REST APIs** for backend processes, handling **third-party APIs** and **RESTful APIs** using **Axios** for efficient data retrieval and manipulation in flight, bus, and hotel booking functionalities.
- Created a fully dynamic **admin dashboard** and **subadmin panel** to monitor and control application functionalities seamlessly, enhancing operational efficiency and management capabilities.

PROJECTS

Social Media Application 🔗
- A cutting-edge social media platform built with React and Material UI. Powered by **Node.js** and **MongoDB**, it offers a seamless user experience.
- Connect, share, and interact in a sleek interface, leveraging the robustness and scalability of the MERN stack.
- **Technologies** and **Tools** used - HTML,CSS,JavaScript, Reactjs, Redux, Material ui, VsCode

Boat Clone
- A clone project of **boat** which is one of India's finest e-commerce websites dealing in headphones and other audible devices.
- It is developed using Next.Js on top of React for back-end Sanity-Studio and for payments functionality Stripe is used.
- **Technologies** and **Tools** used - HTML,CSS,JavaScript, Reactjs,Redux, Material ui,VsCode

Movie Vault 🔗
- An incredible IMDB clone developed using **React** and styled with **Tailwind CSS**. Powered by **Node.js** on the backend, Movie Vault leverages the **IMDB API** for a comprehensive and up-to-date movie database.
- Discover, explore, and rate your favorite movies, access detailed information, and stay informed about the latest releases. With its sleek design and powerful functionality.
- **Technologies** and **Tools** used - HTML,CSS,JavaScript, Reactjs, Redux, Node.js, VsCode
